

# CancerSecure

## The global answer to cancer

- Receive access to the world's best hospitals and the most advanced treatments and expertise in the treatment of cancer
- Employees have better chances for successful treatment and better quality of life
- Attract talents and ensure their long-term loyalty with a unique and innovative insurance benefit

**Precision medicine**

- Access to advanced molecular profiling and genomic testing for cancer
- World-leading expert interpretation of the lab results and an in-depth first clinical medical report
- Provision of a personalized cancer treatment plan that is tailored to the molecular profile of the patient, including:
  - Traditional and targeted therapies
  - Relevant clinical studies and support with participation
  - Family tests to determine and identify hereditary mutation

**Second medical report**

Access to a unique network of more than 50,000 international experts who are recognized as the best in their field. A detailed analysis of the available medical information makes it possible to determine the best specialist for each case. The latter prepares a second medical report based on their expertise and professional experience, after thorough review of the patient's existing medical documents.

**Cross-border treatment**

- Access to the **best specialists and treatment centers** around the world
- **€5 million coverage** for treatment and travel expenses (compensation period of 35 months per claim)
- Utilization of all treatment methods abroad, **including the latest cancer therapies** (CAR-T, proton beam, targeted therapies, immune therapy)
- Payment and organization of all **travel and accommodations** in business class and 5* hotels
- **€200 per day** to cover ancillary expenses during the entire stay abroad (**no expenses for the patient**)
- Concierge service – **extensive support and assistance** during treatment and after the patient returns to Germany
