

Mission

The objective of our Corporate Customers business unit is holistic support of the client for underwriting issues involving risk management, finance management and personnel management. Specialized teams introduce solutions for these issues that protect management, the employees or the balance sheet, i.e. liquidity, of the company.

Special solutions for fleet management round out this holistic approach. Our own network, MRH Trowe Connect, controls the programs internationally. Client satisfaction is defined as the key performance indicator (KPI) and is the authoritative measured value for company success.

Support occurs personally, independently, competently on the basis of owner-managed values.

Team of Experts
