

CancerSecure

The global answer to cancer

- Receive access to the world's best hospitals and the most advanced treatments and expertise in the treatment of cancer
- Employees have better chances for successful treatment and better quality of life
- Attract talents and ensure their long-term loyalty with a unique and innovative insurance benefit

Precision medicine

- Access to advanced molecular profiling and genomic testing for cancer
- World-leading expert interpretation of the lab results and an in-depth first clinical medical report
- Provision of a personalized cancer treatment plan that is tailored to the molecular profile of the patient, including:
 - Traditional and targeted therapies
 - Relevant clinical studies and support with participation
 - Family tests to determine and identify hereditary mutation

Second medical report

Access to a unique network of more than 50,000 international experts who are recognized as the best in their field. A detailed analysis of the available medical information makes it possible to determine the best specialist for each case. The latter prepares a second medical report based on their expertise and professional experience, after thorough review of the patient's existing medical documents.

Cross-border treatment
