### Team of Experts

#### Individual insurance solutions for high-quality personal belongings

Owners of high-quality personal household contents and valuables want them to be well protected! Of course, luxury household contents also require proper insurance coverage. In addition to valuables, luxury furnishings with high insured sums also include unique collector's items such as design furniture, wines, whiskey, luxury handbags and custom-made household articles. Conventional household content insurance policies often do not provide sufficient coverage for high-quality household contents.

#### Coverage for privately owned high-class buildings

Additional coverage is available for high-class real estate such as villas, historic buildings or palaces, as well as vacation homes.
